

e-TRAP TRANSCEIVER

A better way to shoot clay

Introducing a new range of high performance wireless transceivers for clay target shooting.

With exceptional range you won't miss another target due to low performance radio equipment.

The new Microtech Designs E-Trap Transceiver is the ultimate clay trap activation system.

Features

- Long range up to 200 metres
- Bio directional communication
- Simple to program
- Store up to 200 remotes
- Low voltage operation 12VDC
- Compatible with all Microtech Designs remote and voice enabled handsets
- Available with different style plugs or non-terminated 1200mm cable

Includes 5 Year warranty.
